Profile

Fresh graduate in Statistics from Universitas Indonesia with hands-on experience in data analytics across service performance, marketing campaigns, and public sector research. Experienced in data processing, statistical analysis, dashboard development, and performance reporting using Python, SQL, R, Excel, Power BI, and Google Looker Studio to support data-driven decision-making.

Work Experience

IT & Digital Risk Analyst – Bank Rakyat Indonesia (BRI) **Sep 2026 – Present**
Bendungan Hilir, Central Jakarta

- Built a Power BI dashboard consolidating risk data and 1,000+ error incidents across 200+ digital vendors, enabling the team to monitor vendor performance and prioritize risk follow-up.
- Conducted digital risk assessments of 30+ prospective digital partners using Excel, providing risk-based inputs to support partnership evaluation and decision-making.

Data Analyst Intern – Asuransi Astra **Feb 2026 – Aug 2026**
TB Simatupang, South Jakarta

- Analyzed customer satisfaction (CSI), SLA compliance, and service-time data across 4 product lines and 15 branches, identifying service gaps that informed branch-level performance improvements.
- Built monthly integrated performance reports consolidating CSI, SLA, and operational metrics for 15 branches, used by managers and branch heads for service evaluation and corrective action.
- Developed a Python/Flask automation tool that reduced monthly report turnaround from 3 days to 1 day, eliminating repetitive manual data processing steps across the analytics workflow.

Data Analyst Intern – AnyMind Group Indonesia **Jun 2025 – Dec 2025**
Sudirman, Central Jakarta

- Automated cross-platform data aggregation from 4 social channels (Instagram, TikTok, X, YouTube), reducing manual data preparation from a full day to a few hours.
- Delivered 30+ KOL campaign analysis decks for 15+ clients, with recommendations that contributed to client budget adjustments and campaign extensions.
- Built a Looker Studio dashboard tracking KOL performance across active campaigns, adopted by 15 team members for identifying top-performing content formats and channels.

Survey Analyst Intern – Badan Pusat Statistik RI **Dec 2024 – Feb 2025**
Juanda, Central Jakarta

- Refined 20+ survey variables and indicators for national-level surveys (SUSENAS, Economic Census) using Excel, SPSS, and R, supporting methodological consistency and data quality.
- Conducted spatial analysis, regression, and statistical forecasting on regional datasets, producing analytical reports published on the BPS website.

Leadership Experience

Research & Development (RnD) Bureau – BEM UI **Feb 2024 – Nov 2024**
Depok, West Java

- Led a team of 11 in market research and strategic analysis, delivering data-driven recommendations to 15 bureaus for program prioritization and execution.
- Built reporting workflows using Excel and Google Looker Studio, translating survey data into insights for leadership decision-making.

Education

Statistics – Universitas Indonesia (UI) **Aug 2022 – Aug 2026**
Depok, West Java

- **GPA: 3.54 / 4.00.**
- **Thesis:** Sentiment Analysis and Topic Detection Using NLP Deep Learning.
- Relevant Coursework: Forecasting, Database Systems, Quality Control, Data Analysis, Data Visualization, Machine Learning, and Deep Learning.
